

Features :

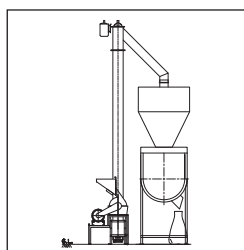

- H-Series is a batch type machine in which grinding & mixing is performed simultaneously.
- H-Series is used to manufacture poultry feed, cattle feed, goat feed, shrimps feed & fertilizers. (For dry materials & mash type only.)
- Strong & rigid steel construction.
- Minimum floor area required.
- High gain in minimum H. P. consumption.
- Requires minimum labour.
- Minimum noise.
- Materials like dry whole fish can be ground with other raw materials.
- To Convey ground material from grinder to mixer, vertical screw conveyor is used so that system becomes semi automatic.
